vehicle protection system

HOW THE PAINTWORK PROTECTOR WORKS

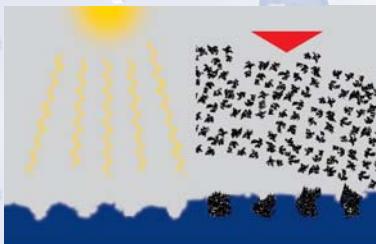

Magnified cross-section of paintwork.

The effects rain and other liquids can have on your paintwork....

.... add to this the effect of ultra-violet light and many abrasive elements attacking your paintwork and you can see how much damage can occur.

The GardX two part system firstly cleans and removes the harmful elements rebuilding the original look of the paint....

.... it then seals the rejuvenated paintwork by creating a protective coating that leaves a *super-smooth* high gloss finish - wash after wash!

THE ULTIMATE VEHICLE PROTECTION SYSTEM

In today's harsh environment the paintwork on the modern car has to put up with a bombardment of external forces such as acid rain, road salt, detergent, tree sap, industrial fallout and the dreaded bird droppings! Add to this the effect of the sun's powerful UV rays and all of this can play havoc with your car's paintwork.

Due to environmental demands manufacturers now have to use water based paints, which whilst being environmentally safe and friendly are far more prone to fading and oxidation. A weekly wash or run through the car wash cannot hope to keep your car in showroom condition.

And the problem with modern wax polishes is they simply do not last, every time you wash your car with detergent you wash away a layer of protection.

However with the GardX Protection system you can benefit from an 8 year warranty protecting your car against almost any abrasive element that it's likely to come up against and help retain that sparkling just like new look.

THE SUPPORT PRODUCTS IN DETAIL

PAINT PROTECTION

STAGE 1 - a pre-seal formulation which penetrates into the molecules of the paintwork preparing it for final sealant with Stage 2.

STAGE 2 - permanently bonds to the Stage 1 creating a protective coating on the paintwork like a second skin which resists attack and contamination from pollutants and road grime.

***CONSERVER** - formulated from Stage 1 & 2, Conserver assists in maintaining the GardX protection. It should be applied monthly as a wash additive.

The GardX paint system permanently etches a layer of protective sealant into the core of your car's paintwork. It has been tested in some of the world's harshest environments. It shields against the effects of the sun's UV rays, acid rain, sea salt and provides a high gloss finish which retains its appearance wash after wash. * With regular maintenance you may never need to polish your car again.

STAIN GUARD

A 'state of the art' formulation which coats each individual fibre with an invisible barrier that protects against liquid spills, dirt, grease and oil. Liquids simply 'bead up' and can be removed by wiping off with a clean cloth or by vacuuming away. After application your car's interior should retain its original "like new" appearance.

GLASS GUARD

Creates a far safer driving environment by coating the windscreen with a formulation which repels rain and causes it to bead and aerodynamically run off. Your area of vision dramatically improves by keeping glass free of rain, snow, frost, salt, dirt, bugs and grit. Suitable for all glass surfaces.

MIST GUARD

Enhances the visibility through your windscreen - no more windshields coated with morning condensation. Developed by the Ophthalmic industry, Mist Guard helps prevent mist or moisture forming on the inside of the windscreen creating a much safer driving environment.

LEATHER GUARD

An exclusive leather treatment which seals the hide, protecting it against stains, dirt and liquid spills. At the same time moisturising the leather to retain that supple natural look and feel.

GardX protects the 'Bat out of Hell' race boat in the V24 Offshore Powerboat Championship.

*GardX Vehicle Protection System
with an 8 year warranty.*
